Suggested places to visit in a hire-car	31

INTRODUCTION

Please note that unless described otherwise, all these routes were in reasonable condition at the time of writing, but this situation could change quickly in an area of sometimes violent weather and subsequent land-slips or altered surfaces. The locals' fondness for bulldozers can also destabilize routes or even completely bury them. Most paths have at least some loose stones, and rain can make the steeper ones unsuitable for the less agile. Written for the active walker, none of the walks are intended as a light stroll, nor are they suitable for someone with, for example, dodgy ankles, bad knees or a serious weight or health problem.
